

UDIA National Housing Pipeline®

NHP 2025

Developer Survey Overview,
FAQs &
Step-by-Step How-To-Guide

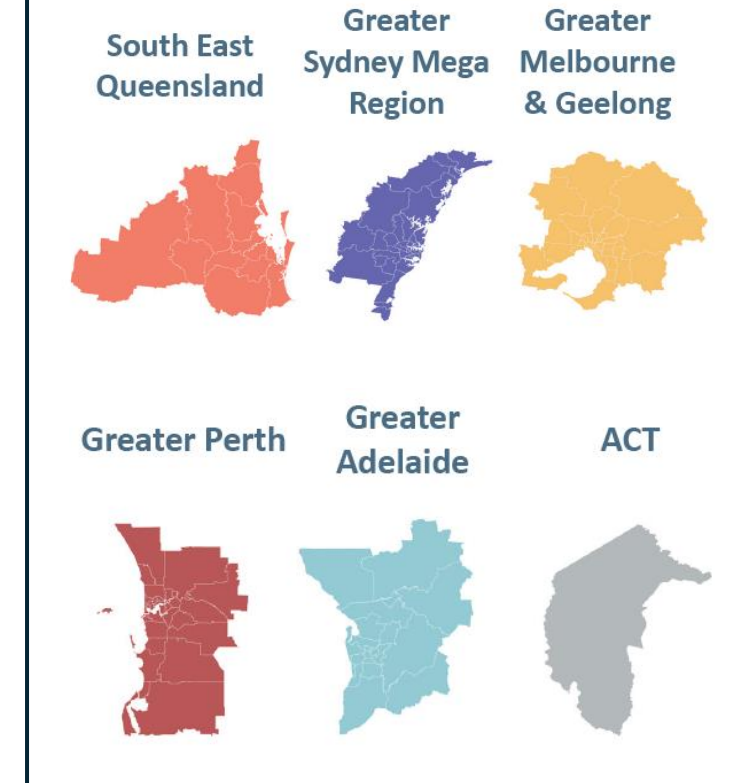

July 2025

UDIA National Housing Pipeline®: 2025 Developers Survey Overview

- UDIA's National Housing Pipeline® (NHP) project has been designed to provide an objective and robust assessment of the state of play of land availability and land readiness for residential development across Australia's major housing markets.
- A core objective of the UDIA NHP program is to provide a development industry 'vetted' quantification of the forward 10-year pipeline of land supply and residential dwellings anticipated for development, by location and dwelling type and tenure.
- A key input into the annual NHP reporting is data through our fit-for-purpose NHP Developer's Survey which is powered by the MapMySay survey platform.
- The annual NHP survey is focussed on UDIA's developer members providing intelligence and updates on the status of planning, development and environmental approvals, as well as the status of enabling infrastructure requirements for all owned/controlled undeveloped land holdings located across the NHPs Greater Metropolitan reporting regions.
- The NHP Developer Survey also asks for total residential yield capacity and year-on-year estimates of dwelling commencement by typology (i.e. houses, townhouses, apartments).
- The purpose of this document is to provide answers to frequently asked questions related to the NHP Developers Survey, and also provide a Step-by-Step guide to accurately completing the survey questions.

**Figure 1: NHP 2025
Reporting Regions**

1) What is the UDIA National Housing Pipeline (NHP)?

- *Launched in 2023 the NHP is annual UDIA research initiative which assembles various data sets to present a snapshot of land and residential dwelling supply as well as present an audit of development constraints and challenges to delivering new homes across Australia's major capital city regions.*

2) Why is UDIA collecting land supply and development constraints information?

- *The origins of the NHP go back to a nationwide and long running disconnect between official State Government monitoring and reporting of land supply information, and the development industry's on-the-ground perspective of forward land supply availability and 'development ready' stocks.*
- *The NHP has been developed to fill an empirical data and evidence gap, which UDIA is uniquely positioned to deliver through it's unparalleled access to developers' intentions for forward residential development.*
- *The NHP reporting is used in messaging to all levels of government as to the needs of the industry, with the NHP data providing clear evidence of forward-supply risks due to particular constraints/challenges/blockages in the development delivery process.*

3) How does the NHP work?

- *The NHP program is owned, driven and delivered by UDIA, and is assembled in close collaboration with UDIA members, local, State and Federal Government agencies, and key property sector stakeholders across the nation.*
- *The annual NHP program of activities comprises of five key phases spanning April to November each year, and is summarised in the below figure:*

Figure Two: UDIA NHP Annual Work Phases

4) Why does UDIA need property developers to complete the NHP Survey?

- *The assembly of data and insights directly from property developers regarding the status of their undeveloped land holdings and forecasts/expectations for delivery of new residential products is a unique and critical data input component to the NHP program. The nationally consistent assembly and incorporation of ‘developers intentions’ information to feed-into forward pipeline forecasting distinguishes the NHP supply monitoring from any other program operational across Australia.*
- *The inclusion of detailed and ‘true’ developers’ intentions for delivery of new residential supply over a ten-year outlook window reduces the level of theoretical/modelled supply forecasting inputs that all other dwelling supply programs relay upon – especially for the medium term (i.e. 6-10 year).*

5) What sort of information does the NHP Survey seek to gather information about?

- *The NHP survey is collecting information from property developers on:*
 - a) *The precise boundaries of undeveloped land holdings.*
 - b) *The status of planning, development, and environmental approvals.*
 - c) *The status of enabling infrastructure requirements to unlock undeveloped land holdings, inclusive of water, sewer, power and regional road infrastructure.*
 - d) *The total residential yield capacity/expectations and year-on-year dwelling commencements by type and by tenure.*
 - e) *Additional intelligence related to each undeveloped land parcel including the project/precinct name and the current feasibility to develop individual land holdings in the current economic and market environment.*

6) How will the UDIA use the information collected through the NHP Survey?

- *UDIA is collating data and insights for use as part of our evidence=base for solutions-focus advocacy with Government.*
- *UDIA takes great care to protect the confidentiality of information provided by NHP Survey participants, and will only publish aggregated NHP survey data information, and only represent individual land survey plots (developer land holdings) as deidentified dots on published spatial mapping outputs.*
- *Under no circumstances will UDIA transfer any raw NHP survey data to any third parties. Please read our [Data Governance Policy](#) for more information.*

7) How will developer's submitted information be kept confidential and secure?

- *UDIA has established various protocols to ensure that NHP survey data remains secure and confidential throughout NHP reporting cycle. Individual survey responses are deleted from the dedicated UDIA server infrastructure when no longer required. Please read our 'Data Handling Practice Note' for more information.*

8) Is the NHP survey covering infill/apartment development sites, or is it just greenfield land holdings?

- *The NHP Survey collects information on all land holdings which have potential for residential development yield across the entire breadth of each major capital city inclusive of greenfield and infill locations and covering all residential typologies including detached housing, townhouse, mid-rise and high-rise apartments.*
- *The NHP survey is also collecting information about residential tenure types including Affordable and Social Housing, Seniors and Land Lease.*

9) Are non-metropolitan/ regional areas covered by NHP Survey?

- *No, currently regional areas are not currently covered by NHP reporting. Please refer to Figure 1 for NHP 2025 reporting coverage.*
- *Please note that the Hunter, Central Coast and Illawarra regions are covered in NSW reporting and all 11 South East Queensland LGAs are covered in QLD reporting.*

10) Can I obtain access to spatial mapping and core NHP reporting data and files?

- *Requests for spatial and tabular reporting data from the NHP reporting are treated on a case-by-case basis. No agreed releases of NHP reporting data will include individual NHP project site intelligence. All data requests should be directed to the UDIA national office (udia@udia.com.au).*

For further questions regarding the NHP Survey or the broader NHP Program please contact UDIA NHP Project Lead Toby Adams (tadams@udiawa.com.au)

UDIA NHP Developer Survey: Step by Step How-To Guide

Welcome to the 2025 UDIA National Housing Pipeline® Survey

UDIA's National Housing Pipeline® Project is aiming to curate a development industry assessment of the short- and medium-term pipeline of land supply for forward residential development across each of Australia's capital cities.

The ultimate purpose of the National Housing Pipeline® Project is to provide an objective and robust measure that can be used by Federal, State and Local Governments that identifies how much 'Development Ready' land is available across the capital cities along with the expected residential yields year-on-year, so Governments can incentivise boosting housing supply across the spectrum and combat accelerating affordability challenges.

This Developer/Landowner survey is a critical data input component to the overall project. We are seeking survey participants to:

1. Accurately identify your land holdings or development project area/precinct boundaries – this includes greenfield subdivisions, apartments and townhouse-medium density development sites.

2. Provide an update on the status of the various approvals and enabling infrastructure requirements relevant for your project area/precinct.
3. Provide a forecast of the expected lot/dwelling release schedule from your project area over the forthcoming ten-year period.

UDIA will take great care to protect the confidentiality of information provided by participants to the National Housing Pipeline® Project survey and will only publish aggregated survey data responses. Please read our Data Governance Policy for more information.

Thank you for your participation in the UDIA National Housing Pipeline® Project survey. Don't hesitate to contact the Project Lead Toby Adams with any questions or queries you have about the survey and the forward use of the collected survey data.

Introduction

The NHP Survey has been created for UDIA's property developer members to provide data and status updates on all undeveloped land holdings – which are intended to be developed for residential dwellings.

This 'How-To' guide helps survey participants navigate through the survey tool, and also provides additional context/information not included in the survey form itself.

The NHP survey requires a range of information to be entered regarding individual land holdings (as outlined overleaf), and in 2025 we have introduced a 'save-as-you-go' functionality.

Please note: it takes on average eight minutes to complete the NHP survey questions for each development site/landholding – assuming the survey respondent has the necessary information to hand.

UDIA NHP Developer Survey: Step by Step How-To Guide

Before you start...

The survey will ask you to identify on a map **ALL** of your current undeveloped land holdings or projects, as well undeveloped portions of existing active projects. We ask you to indicate the status of approvals and enabling infrastructure for each undeveloped land holding or project.

The survey is designed to allow you to save as you go.

By responding to the survey, I confirm that I have been given information about the UDIA National Housing Pipeline® and have had an opportunity to ask the UDIA NHP Project Lead (Toby Adams tadams@udiawa.com.au) or one of the UDIA State office contacts (as set out below) any questions I may have about the research and my participation. I have had an opportunity to review the Data Governance Policy and understand how my data will be used and stored. I understand that if I have any enquiries about the research, I can contact the UDIA NHP Project Lead or one of the UDIA State Office contacts set out below. If I have any concerns or complaints regarding the way the research is being conducted or reported, I can contact UDIA National (udia@udia.com.au). By completing the survey, I am indicating my consent for my project data to be used in an aggregated reporting manner. I understand that the data collected from my participation will be used to create a development industry assessment of the short and medium term pipeline of land supply for forward residential development across each of Australia's capital cities and I consent for it to be used in that manner.

UDIA State office contacts

UDIA NSW: Nathan Boulous, Southern Regional & Research Manager (e) nboulous@udiansw.com.au (m) 0499 399 978

UDIA Victoria: Jack Vaughn, Director of Policy (e) jack@udiavic.com.au (m) 0401 573 170

UDIA WA: Toby Adams, Head of Research (National & WA) (e) tadams@udiawa.com.au (m) 0447 132 608

UDIA SA: Nic Robertson, Membership & Business Development Manager (e) robertsonn@udiasa.com.au (m) 0478 768 430

Select your state below to start the survey

ACT

NSW

SA

QLD

VIC

WA

Step One: State selection

The first step in taking the NHP survey is to select a State for which you are entering development site information for.

By selecting a 'State' button a unique set of State/Territory specific survey questions will be generated for you to work through.

Each UDIA State Office division has sole access to the raw survey data submitted and is solely responsible for securely handling and storing. All queries regarding the NHP survey can be directed directly to the listed UDIA State office contacts or directly to NHP Project Lead Toby Adams tadams@udia.com.au

UDIA NHP Developer Survey: Step by Step How-To Guide

The survey will ask you to identify on a map ALL of your current undeveloped land holdings or projects, as well undeveloped portions of existing active projects. We ask you to indicate the status of approvals and enabling infrastructure for each undeveloped land holding or project.

The survey is designed to allow you to save as you go.

By responding to the survey, I confirm that I have been given information about the UDIA National Housing Pipeline® and have had an opportunity to ask the UDIA NHP Project Lead (Toby Adams tadams@udiawa.com.au) or one of the UDIA State office contacts (as set out below) any questions I may have about the research and my participation. I have understood that if I have any enquiries, I will be able to contact the relevant State Office contacts set out below. If I have any concerns or complaints regarding the survey, I am indicating that I will be able to contact the relevant State Office contacts (udiaw@udiaw.com.au). By completing the survey, I am indicating that I understand that the data collected from my participation will be used to develop the UDIA National Housing Pipeline and supply for forward residential development across each of Australia's states and territories.

UDIA State office contacts

UDIA NSW: Nathan Boulous, Southern Cross University
UDIA QLD: Taylor Hood, Director of Southern Cross University
UDIA Victoria: Jack Vaughn, Director of Southern Cross University
UDIA WA: Toby Adams, Head of Research and Development
UDIA SA: Nic Robertson, Membership and Engagement

 **Map My Say** [My Account](#)

Development Ready Land

On this page you will map all of your undeveloped land holdings or projects.

If cadastre does not display please zoom in further or toggle cadastre on/off under layer tool ("My Map"). **Some states may take longer to load the cadastre layer.**

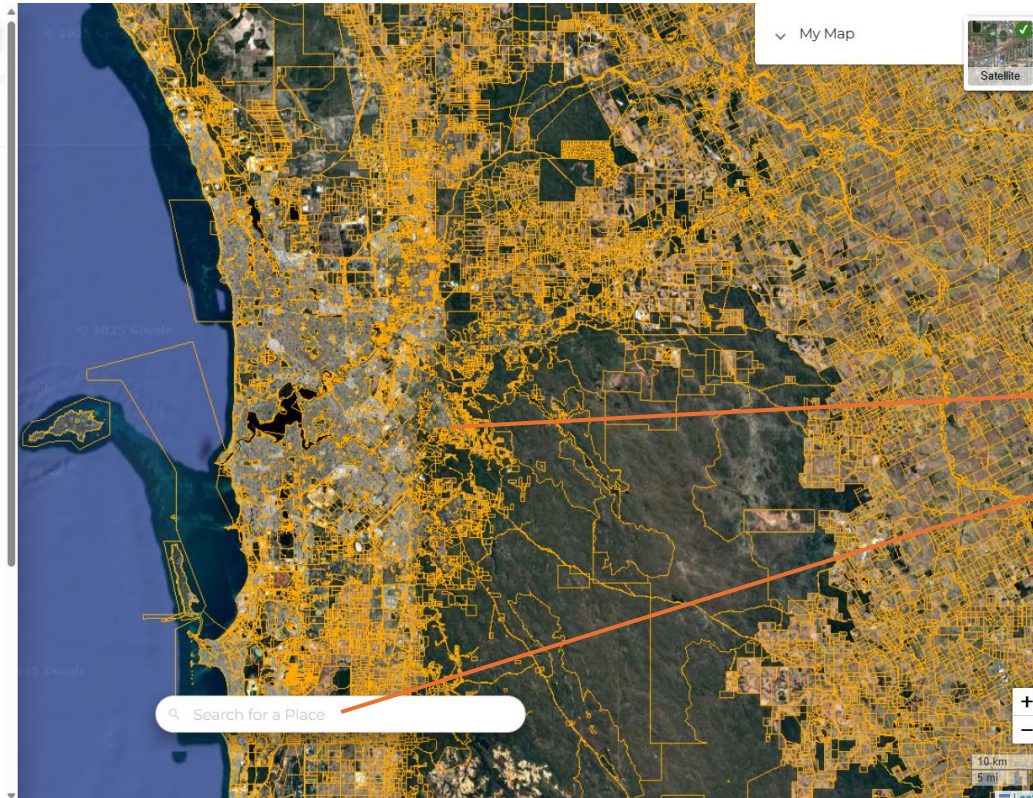

1. Navigate to your undeveloped land holding on the map.
To find your land holding you can move the map and zoom into your land holding OR enter the address in the search bar.
2. Click on the "draw a polygon" button below to activate the mapping tool and draw a polygon to show the boundary of your undeveloped land holding.

Click to draw a polygon

3. Answer the questions in the pop-up box to indicate the status of approvals and enabling infrastructure of this land holding. Select the Done button to return to the map screen.
4. Click the "draw a polygon" button again to re-

[Previous](#)  [Finish](#)

Step Four: Navigating to your first landholding

This stage involves the navigating to the location of your first landholding.

You can navigate to the landholding by either:

- a) zooming into the interactive map to the correct location, or;
- b) entering in a street address into the search bar in the map window

Undeveloped land h...

2. What suburb is this landholding/precinct/project located in?

Choose an option *

3. What local government area is this landholding/precinct/project located in?

Choose an option *

4. What are the types of residential development expected in this landholding/precinct/project?

(select all that apply)

complete all mandatory questions to submit data

Save & Logout Done

Step Six: Entering landholding information

Part One of this stage (Qs1-3) involves entering responses to top line questions regarding the name and location of land holding/future development site.

Please note – almost every question in the survey is mandatory so a response is required for each question posed in the survey tool.

UDIA NHP Developer Survey: Step by Step How-To Guide

MapMySay My Account

Development Future Project Site Area

On this page you can draw a polygon on the map to define the land holdings for your project.

If cadastre does not exist on/off map, it will take longer to load the map.

1. Navigate to the map.
To find your land holding, click on the map.

2. Click on the 'draw a polygon' button to activate the tool and show the boundary of your land holding.

3. Answer the questions about the status of this land holding and return to the map.

4. Click the "draw a polygon" button again to re-draw the boundary of your land holding.

4. What are the types of residential development expected in this landholding/precinct/project?
(select all that apply)

- ☐ Greenfield lots with detached houses
- ☐ Townhouses
- ☐ Apartments
- ☐ Other (please specify)

5. Is your proposed development financially feasible to deliver in the current operating environment?

☐ Yes ☒ No

What is/are the major financial obstacle/s to project viability?

Please specify

complete all mandatory questions to submit data

[Save & Logout](#) [Done](#)

Step Six: Entering landholding information

Q4 - Please select all of the dwelling typologies anticipated for development on the landholding – for the entire life cycle of landholding/development precinct.

Q5 – This question is aimed at understanding if the landholding is financially feasible to develop new dwelling supply in the current market.

Selecting 'Yes' will advance you to the next section, while 'No' will present a sub-question which requires a Free Text answer eg 'Insufficient Pre-Sales Demand', or 'Input Construction Costs' etc.

The aggregation of answers to this feasibility question will provide UDIA with solid data around development feasibility/viability issues holding back forward supply.

UDIA NHP Developer Survey: Step by Step How-To Guide

Future Project Site Area

Part Two: Enabling Infrastructure

6. Sewer Infrastructure (Trunk – generally external to site)

6a. Please select the option which best describes the status of sewer infrastructure to service this landholding?

☒ Delivered or Under Construction
☐ Construction Funding Committed
☐ Other Funding Committed (i.e. business case, early design)
☐ No Funding Commitment
☐ Trunk sewer not required for this landholding

Future Project Site Area

☐ Other Funding Committed (i.e. business case, early design)
☒ No Funding Commitment
☐ Trunk sewer not required for this landholding

6b. Is this sewer infrastructure required to start commencement of development of dwellings on this landholding?

☐ Yes
☐ No

6c. When does this infrastructure item need to be delivered to enable development to proceed as per your current project plan to deliver new dwellings?

(Select a financial ... ▾)

6d. Do you have the financial capacity to deliver this sewer infrastructure yourself, if it was permitted?

☐ Yes
☐ No
☐ Uncertain

6e. Is this infrastructure being delivered/planned to be delivered by a provider other than Water Corporation?

☐ Yes
☐ No

complete all mandatory questions to submit data [Save & Logout](#) [Done](#)

Step Seven: Enabling Infrastructure information

Part Two of the survey is focussed on enabling infrastructure requirements relevant to your landholding. This is core NHP survey information and each question in this section is mandatory.

Q6 – Please select the status of **Sewer infrastructure** (defined as ‘Trunk’ which is generally external to the site boundary of the landholding).

Q6 – If you select ‘Delivered or Under Construction’ or ‘Trunk sewer not required for this landholding’ you will advance to Q7.

If you select ‘Construction Funding Committed’ or ‘Other Funding Committed’ or ‘No Funding Commitment’ you will get a set of sub-questions pop-up, which each require a response

Please note - there are slight variations in these Q6 sub-questions between each State based survey tool – designed to address the local development context

Future Project Site Area

☒ No

7. Water Infrastructure (Trunk – generally external to site)

7a. Please select the option which best describes the status of water infrastructure to service this landholding?

- ☐ Delivered or Under Construction
- ☐ Construction Funding Committed
- ☐ Other Funding Committed (i.e. business case, early design)
- ☐ No Funding Commitment
- ☐ Trunk water not required for this landholding

Future Project Site Area

7b. Is this water infrastructure required for commencement of development of dwellings on this landholding?

- ☐ Yes
- ☐ No

7c. When does this infrastructure item need to be delivered to enable development to proceed as per your current project plan to deliver new dwellings?

(Select a financial ... ▾)

7d. Do you have the financial capacity to deliver this water infrastructure yourself, if it was permitted?

- ☐ Yes
- ☐ No

complete all mandatory questions to submit data

Done

Step Seven: Enabling Infrastructure cont.

Q7 – Please enter the status of trunk **Water Infrastructure** required to service your landholding.

Q7 If you select 'Delivered or Under Construction' or 'Trunk sewer not required for this landholding' you will advance to the next question (Q8)

If you select 'Construction Funding Committed' or 'Other Funding Committed' or 'No Funding Commitment' you will get a set of sub-questions pop-up, which each require a response

Please note - there are slight variations in these Q7 sub-questions between each State based survey tool – designed to address the local development context

Future Project Site Area

8. Electrical/Power Infrastructure (Trunk – generally external to site)

8a. Please select the option which best describes the status of power infrastructure to service this landholding? _____

- ☐ Delivered or Under Construction
- ☐ Construction Funding Committed
- ☐ Other Funding Committed (i.e. business case, early design)
- ☐ No Funding Commitment
- ☐ Trunk power not required for this landholding

8b. Is this electrical/power infrastructure required for commencement of development of dwellings on this landholding?

- ☐ Yes
- ☐ No

8c. When does this infrastructure item need to be delivered to enable development to proceed as per your current project plan to deliver new dwellings?

(Select a financial ... ▼)

8d. Do you have the financial capacity to deliver this power infrastructure yourself, if it was permitted?

- ☐ Yes
- ☐ No
- ☐ Uncertain

8e. Is this infrastructure being delivered/planned to be delivered by a provider other than Western Power?

- ☐ Yes
- ☐ No

Step Seven: Enabling Infrastructure cont.

Q8 – Please enter the status of trunk **Electrical/Power Infrastructure** required to service your landholding.

Q8 - If you select 'Delivered or Under Construction' or 'Trunk power not required for this landholding' you will advance to the next question (Q9)

If you select 'Construction Funding Committed' or 'Other Funding Committed' or 'No Funding Commitment' you will get a set of sub-questions pop-up, which each require a response

Please note there are slight variations in these Q8 sub-questions between each State based survey tool – designed to address the local development context

Future Project Site Area

9a. Please select the option which best describes the status of regional road infrastructure to service this landholding?

- ☐ Delivered or Under Construction
- ☐ Construction Funding Committed
- ☐ Other Funding Committed (i.e. business case, early design)
- ☐ No Funding Commitment
- ☐ Regional Roads not required for this landholding

9b. Is this regional road infrastructure required for commencement of development of dwellings on this landholding?

- ☐ Yes
- ☐ No

9c. When does this infrastructure item need to be delivered to enable development to proceed as per your current project plan to deliver new dwellings?

(Select a financial ... ▼)

Step Seven: Enabling Infrastructure cont.

Q9 – Please enter the status of **Regional Road Infrastructure** required to service your landholding.

Q9 - If you select 'Delivered or Under Construction' or 'Regional Roads not required for this landholding' you will advance to the next question (Q9)

If you select 'Construction Funding Committed' or 'Other Funding Committed' or 'No Funding Commitment' you will get a set of sub-questions pop-up, which each require a response

Step Seven: Enabling Infrastructure cont.

Q10 – Please enter the status of **High-Speed Broadband Infrastructure** required to service your landholding.

Please Note – There are no sub-questions for Q 10.

Step Eight: Planning & Environmental Approvals

Q11 – Please enter the zoning status of your landholding.

Q12 – Please enter the most advanced Planning & Development Stage which is listed.

Please Note – There are no sub-questions for Q 11 or Q12.

10. High Speed Broadband Infrastructure

Please select the option which best describes the status of high-speed broadband infrastructure to service this landholding?

- ☒ Delivered or Under Construction
- ☐ Construction Funding Committed
- ☐ Other Funding Committed (i.e. business case, early design)
- ☐ No Funding Commitment

Part Three: Planning & Environmental Approvals

11. Is the landholding/future development area currently zoned appropriately for the proposed development?

- ☒ Yes
- ☐ Rezoning Underway/Pending
- ☐ No - but strategically identified
- ☐ No

12. What Planning & Development Stage is this landholding up to?

- ☒ Zoning Approved
- ☐ District/regional structure plan Approved
- ☐ Local Structure Plan Approved
- ☐ Subdivision/Development Application Determined
- ☐ Awaiting Construction Commencement
- ☐ Construction Underway (including via staged delivery)

Step Eight: Planning & Environmental Approvals

13. What is the status of environmental approvals on your project/landholding

- ☐ Not Applicable/ Uncertain
- ☐ Required but no work done to date
- ☒ All State and Federal Approvals Achieved
- ☐ Required and working towards approvals (if selected, please answer the below where relevant to your project)

Q13 – Please enter the status of **environmental approvals** for your landholding.

Q13a & 13b - If you select 'Required and working towards approvals' two sub-questions will pop up pertaining to the status of State and Federal environmental approvals. Please select the most relevant option for both 13a and 13b.

13.a State Approval Required

- ☐ Surveys/Documentation in Progress
- ☐ Application Lodged and in Negotiation
- ☐ Off-Set Plan Required but no offset identified
- ☐ Off-Set Plan Required with likely offset identified

13.b Federal Approval Required

- ☐ Surveys/Documentation in Progress
- ☐ Application Lodged and in Negotiation
- ☐ Off-Set Plan Required but no offset identified
- ☐ Off-Set Plan Required with likely offset identified

14. Are there any other planning decisions or approvals that you are awaiting determination on that will delay the commencement of this project?

Q14 – This question allows free text entries to indicate what other planning decisions or approvals that are not listed in the survey which may delay the commencement of the project.

This a mandatory question, so if there no other planning decisions or approvals required, please enter 'No' or 'N/A'

15. What is the status of Development Contributions/Local Infrastructure Contributions?

- ☒ Pre-Lodgement
- ☐ Lodged/Awaiting determination
- ☐ Approved
- ☐ Not applicable/uncertain

15a. When was the last formal review of the Developer Contributions Plan advertised?

15b. How long do you anticipate these issues will take to collectively resolve?

- ☐ <1 month
- ☐ Up to 3 months
- ☐ Up to 6 months
- ☐ Up to 12 months
- ☐ More than 12 months
- ☐ Not applicable/uncertain

16. What is the status of Aboriginal Cultural Heritage Consents?

- ☐ Pre-Lodgement
- ☐ Lodged/Awaiting determination
- ☐ Approved
- ☐ Not applicable/uncertain

Step Eight: Planning & Environmental Approvals

Q15 – Please select the most accurate status of any **development contributions/Local Infrastructure Contributions** which are relevant to the landholding.

Q15a – This is a mandatory question, but if unknown just enter N/A.

Q15b – Please specify the anticipated time frame for resolution of the development contributions due.

If uncertain please select ‘Not applicable/uncertain’.

Q16 – Please select the most relevant status of **Aboriginal Cultural Heritage Consents** relevant for the landholding.

Part Four: Dwelling Yield & Commencement Forecasts

17. What is the total development yield (number of dwellings) to be created upon completion at this landholding/precinct/project by dwelling type?

(Enter the number for each dwelling type. If none, enter 0)

Detached Houses _____

Townhouses _____

Apartments up to 6 storeys _____

Apartments 6+ storeys _____

18. How many of the total expected residential yield on this landholding will be dedicated to the following alternative tenure classes

(If none, enter 0)

Affordable housing _____

Social housing _____

Seniors Living _____

Land Lease _____

Step Nine: Dwelling Yields & Commencement Forecasts

Q17 – This question relates to the total capacity/development yield anticipated for the holding. Please enter a number for each dwelling type.

Please Note – a total yield number is required for each dwelling type. If none enter '0'.

Q18 – This question relates to the total dwelling yield apportioned to the listed 'alternative' tenure types.

Please Note – a total yield number is required for each dwelling type. If none enter '0'.

UDIA NHP Developer Survey: Step by Step How-To Guide

19. What is the anticipated number of dwelling commencements by dwelling type by calendar year at this landholding/precinct/project?

(Note: This means commencement of slabs for detached houses and townhouses, basement excavation for apartments)

(Enter the number for each dwelling type and year. If none, leave blank)

Detached Houses	Townhouses	Apartments
2026	2026	2026
2027	2027	2027
2028	2028	2028
2029	2029	2029
2030	2030	2030
2031	2031	2031
2032	2032	2032
2033	2033	2033
2034	2034	2034

Step Nine: Dwelling Yields & Commencement Forecasts

Q19 – This question relates to the annual number of dwelling commencements expected on the landholding, by dwelling type.

By ‘commencement’ this survey means pouring of slabs for detached houses & townhouses (or commencement of on-site dwelling construction if non slab construction method being used) or basement excavation for apartments.

Please enter the anticipated commencement volumes by dwelling type for as many of the forward ten years as possible.

Please Note - This question is not mandatory (but it is very important) so if the year-on-year commencement volumes are unknown or no commencements are anticipated for a particular year of dwelling type, please just leave blank.

UDIA NHP Developer Survey: Step by Step How-To Guide

20. Do you have any additional comments about the forward pathway for realising timely development production on your landholding, or about your forecast or this survey process?

Select DONE to enter your information for this land holding and close this window.

In the mapping window select the polygon tool  to identify another land holding on the map.

complete all mandatory questions to submit data

Save & Logout

Done

18. How many of the total expected residential yield on this landholding will be dedicated to the following alternative tenure classes

(If none, enter 0)

Affordable housing

Social housing

Seniors Living

Land Lease

Step Ten: Additional comments and completion of landholding specific survey questions

Q 20 – This final question allows any final comments to be submitted about the forward pathway for development delivery on the subject landholding, or to provide comments about the provided forecast of dwellings yields, or for any feedback about the survey.

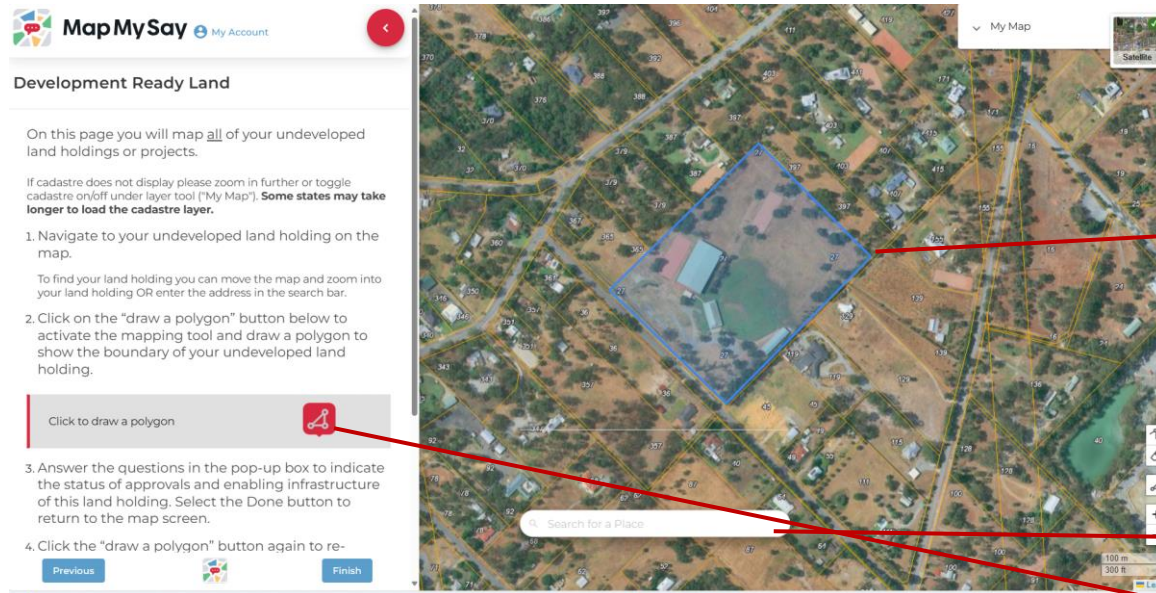

It is a free text field and is mandatory, but if no further comments are desired just enter 'N/A'.

The final step is to press the 'Done' button, which will take you back to the Stage Three mapping window, for you to re-select the polygon tool to identify another land holding to map and answer a new set of survey questions about.

If you aren't quite ready to complete the survey for any particular landholding press the 'Save & Logout' button and you can return to your partially completed survey at a later date.

Please note - If there are any mandatory questions which require answers they will be highlighted in red for you to fill-in.

UDIA NHP Developer Survey: Step by Step How-To Guide

Step Eleven: Adding a new polygon

Once you have clicked the 'Done' button on the previous screen (and there are no mandatory questions which are not filled-in) you will be returned to the mapping window, centred on the landholding polygon you have just completed the survey for.

This mapping window is active so you can manoeuvre the interactive map to your next land holding, or enter a street address into the mapping window search bar.

When you have located the next landholding click on the Polygon creator button and repeat the survey taking process from Step 5.

Please Note – if you are wishing to add landholdings that are located in a different State or Territory you will need to exit the Survey tool and commence a new survey entry starting from Step One and select the 'Sign up – first time use' option in the registration process in Step Two.

UDIA NHP Developer Survey: Step by Step How-To Guide

activate the mapping tool and draw a polygon to show the boundary of your undeveloped land holding.

Click to draw a polygon

Answer the questions in the pop-up box to indicate the status of approvals and enabling infrastructure of this land holding. Select the Done button to return to the map screen.

Click the “draw a polygon” button again to re-activate the mapping tool and indicate another land holding on the map and answer the associated questions.

Repeat these steps for each additional land holding.

Once you have mapped and entered information for all of your land holdings select the FINISH button.

Finish

Step Twelve: Completing & submitting the NHP Survey

Once you have finished adding polygons and completed the survey questions for the final landholding you are ready to submit your survey data to UDIA.

Click on the ‘Finish’ button

This final window will appear and signifies the successful completion of the NHP survey.

You can return to the NHP Survey Homepage by clicking on the ‘Return to homepage’ button, or alternatively close your browser window.

Thank you for your support of the UDIA NHP program and please don’t hesitate to contact NHP Project Lead, Toby Adams tadams@udia.com.au with any survey queries or problems you encounter along the way.

Thank you for your participation in the National Housing Pipeline® Survey.

Please contact the Project Lead Toby Adams with any questions or queries you have about the survey and the forward use of the collected survey data.

UDIA NHP Developer Survey Data – end reporting

Summary Of Key Findings: National

Summary of Key Findings: State by State

Developers Intentions Survey: National Summary

- The 2024 NHP Pilot developers intentions survey phase collected site information, estimates of dwelling yields and the status of enabling infrastructure and approvals for over 450 undeveloped development sites across Australia.
- The total potential dwelling yields from these surveyed land holdings could realise at least 250,000 dwellings.
- The vast majority of landholdings require at least one type of enabling infrastructure commitment/funding and/or various types of planning, environmental or building approvals in order to commence development of new residential product supply.
- There is considerable spatial variation in project requirements for enabling infrastructure. The NHP provides a road map for where state government investment needs to be focused.
- Please refer to the accompanying [NHP Technical Report](#) for further detail and insights on this project phase.

The NHP & Annual Housing Targets

- The annual reporting cycle of the UDIA National Housing Pipeline® allows for a regular stocktake of how each NHP reporting region is tracking against State and Territory housing targets.
- In Appendix 1 a five-year dwelling production forecast is provided for each capital city reporting region – based on core NHP data in addition to additional supply intelligence*. In future NHP reporting releases, UDIA will publish ten-year dwelling production forecasts for each reporting region – subject to the collation of sufficient levels of developer intention survey returns.
- At the Combined Capital City scale, Figure 12 presents the long run history of aggregate dwelling completions and approvals as well as the 2024 NHP five-year forecast to 2029. This analysis indicates that there will be a **around a 395,000 dwelling completion shortfall** within the NHP capital city reporting regions against the National Housing Accord target over the coming five years. This significant shortfall is underpinned by expectations of sustained weakness in the multi-unit sector.

Conclusion

The UDIA NHP Developer Intentions survey data is a key component of the annual collection of residential development and forward supply data undertaken through the UDIA National Housing Pipeline® program.

The project scale development site intelligence provided by property developers through the NHP survey is a critical data input, and the aggregated data provides the basis for core NHP end-reporting - as featured on the UDIA National website: [UDIA National Housing Pipeline® \(NHP\) | UDIA National](#).

Thank you for your support of the UDIA NHP program and please don't hesitate to contact NHP Project Lead, Toby Adams tadams@udia.com.au with any survey queries or problems you encounter along the way.
